SUMMARY

Driven Data Analyst with hands-on industry experience and a strong teaching background, skilled in translating data into actionable insights. Passionate about continuous learning and eager to contribute to a data-driven organization focused on innovation and informed decision-making.

EDUCATION

Data Science Google Data Analytics, Google	2024 Passed
Bachelor of Commerce Tolani College of Commerce, Mumbai University	March 2023 8.48 CGPA

EXPERIENCE

Business Data Analyst - I (Full time) <i>Clustora Analytics</i>	July 2025 — Present <i>Mumbai, Maharashtra</i>
• Provided actionable data insights to guide business growth strategies and decision-making. • Designed and implemented customized dashboards and KPIs in Power BI to monitor real-time business performance. • Created automated reporting systems using SQL and Excel macros, reducing manual efforts and improving efficiency. • Prepared detailed MIS reports to assist leadership in financial planning, forecasting, and operational strategy. • Provided actionable data insights to guide business growth strategies and decision-making. • Conducted in-depth data analysis to uncover business trends, performance gaps, and growth opportunities in a startup environment.	
AI/ML Trainer (Part-Time / Contract) <i>Fusion Classroom Edutech Pvt Ltd</i>	August 2025 — Present <i>Mumbai, Maharashtra</i>
• Delivered classroom and live online training in Artificial Intelligence and Machine Learning to college students, covering both theoretical concepts and practical applications. • Trained students in Python, SQL, Business Intelligence tools, and Version Control Systems, emphasizing industry-relevant workflows and best practices. • Designed and implemented end-to-end machine learning models, including data preprocessing, model building, evaluation, and deployment. • Developed hands-on projects such as Telecom Churn Prediction and Consumer Behavior Analysis to demonstrate real-world ML use cases. • Created interactive presentations and learning materials to enhance engagement and improve conceptual understanding during in-person and online sessions.	
Data Analyst Intern <i>VMV Tech Solutions</i>	December 2024 — June 2025 <i>Mumbai, Maharashtra</i>
• Analyzed, cleaned, and transformed large datasets to improve business insights and operational efficiency. • Developed and optimized SQL queries to enhance data retrieval, processing, and reporting capabilities. • Built interactive dashboards and Excel reports for real-time data visualization and performance monitoring. • Collaborated cross-functionally with finance and operations teams to translate analytical findings into actionable insight	

- Conducted interactive lectures on Python and MS Office covering both fundamental concepts and practical applications.
- Designed and delivered course materials, assignments, and assessments to enhance student learning.
- Evaluated students’ performance and progress through regular assessments and project work.
- Analyzed student data, including grades and performance trends, to identify areas for improvement.
- Collaborated with faculty to develop personalized student improvement plans based on performance analysis.

PROJECTS

Data-Driven Web Platform (Python, Streamlit, Power BI, Machine Learning)

- Developed a web platform integrating data cleaning, visualization, and machine learning tools.
- Automated data preprocessing pipelines and generated interactive analytical insights.
- Built predictive models to support strategic decision-making processes.

Superstore Sales Analysis

- Analyzed sales trends, customer behavior, and seasonal demand using statistical techniques.
- Built real-time interactive dashboards with Power BI for business performance monitoring.
- Forecasted regional sales trends and visualized profit margin KPIs to support leadership decisions.

SKILLS

Quantitative Research	Mathematical Optimization, Mathematical Modeling, MySQL
Communication	English, Hindi, Marathi
Tools and Languages	Python, SQL, Microsoft Power BI, Advanced Excel, Machine Learning

ACTIVITIES

- Organized and hosted a Math Game Show for junior college students to encourage interactive learning.
- 1.5 years of teaching experience across various classes and private tuitions (Mar 2022 – Sep 2023).
- Participated in multiple promotional and outreach activities.
- Active in school-level sports and extracurricular events.

CERTIFICATION

- Google Data Analytics Certification [View Certificate](#)
- IBM Data Science Certification
- IBM Python Project Certification
- IBM Data Analysis with Python Certification
- Microsoft Excel Certification
- Meta SQL Certification

HOBBIES

- **Learning New Things:** Continuously exploring new concepts in technology and data analysis.
- **Listening to Music:** Enjoy music to relax and stay focused.
- **Gaming:** Engage in strategic and immersive games to enhance problem-solving and decision-making skills
